# Community Impact Night for Tony - Fighting Glioblastoma

**THURSDAY, DECEMBER 4TH**  
**4:00PM - 9:00PM**

Tony Ramos, an Air Force veteran and dedicated locomotive engineer with BNSF, has been courageously battling glioblastoma, an aggressive and incurable form of brain cancer.

On October 27, 2024, while at work, Tony suffered two grand mal seizures and had to be resuscitated. What doctors first thought was a stroke turned out to be a brain tumor. After emergency transport to UW-Madison, surgery revealed a grade 4 glioblastoma (GBM) – one of the most difficult brain cancers to treat.

Doctors were able to remove 95% of the tumor, but the remaining portion could not be operated on due to its location. Over the past year, Tony has endured radiation, multiple rounds of chemotherapy, and ongoing care at Mayo Rochester, UW-Madison, and Northwestern. Despite every effort, the remaining tumor has begun to grow again.

Throughout this journey, Tony continues to fight with unwavering faith and determination. His wife, Janice, now serves as his full-time caregiver, and together they face daily emotional and financial challenges.

Your support will help the family with medical and travel expenses as Tony continues his fight – and help make special family memories possible.
